

Galle Yellow Hyacinth blownout cameo glass vase

Emile Galle

REF: 3084

Height: 31 cm (12.2")

Description

Galle cameo glass 'blowout vase' C1920 decorated with yellow hyacinths. This vase is normally found with red hyacinths and brown foliage. Yellow with green foliage is rare to find. Blowout vases are made using moulds and are less common than other Galle vases.

The condition is very good. There are few tiny scuffs around the bottom edge of the vase, these are extremely minor but mentioned for accuracy. Please see images.
